SUMMARY

DevOps and Automation Engineer with hands-on enterprise experience in deployment automation, Linux environments, Kubernetes/K3s workflows, and infrastructure support through Cisco Systems. Skilled in Python scripting, Docker, REST APIs, Git, and cloud-native technologies with a strong interest in CI/CD and DevOps engineering. Passionate about automating repetitive workflows, improving deployment efficiency, and building scalable infrastructure solutions.

EXPERIENCE

Cisco Systems India Pvt Ltd

Software Automation Trainee

Oct-2025 - Present

- Contributing to deployment and automation workflows within Cisco SBG FMC Team environments.
- Working on FTD simulator deployment automation involving VM provisioning, IP assignment, NAT configuration, and K3s-based simulator setup workflows.
- Automating repetitive infrastructure and deployment operations using Python scripting and API-driven approaches.
- Gained hands-on exposure to Linux systems, Kubernetes/K3s concepts, Docker-based environments, and CI/CD fundamentals.
- Collaborating with cross-functional teams to improve deployment efficiency and streamline simulator setup processes.
- Working with Git-based version control, enterprise workflow practices, and automation-first infrastructure approaches.

Vulture Lines Pvt Ltd

Full Stack Developer Intern

2025

- Developed an **AI-powered recommendation system** using collaborative, content-based, and hybrid models.
- Leveraged **real-time query analytics** to improve product relevance and increase customer buying rate.
- Implemented scalable backend logic and improved customer engagement metrics, inspired by Amazon-style systems.

Siemens Industry Software (India) Pvt Ltd

Web Developer Intern

2024

- Designed and deployed **LearnNow Training Management System** using the Mendix low-code platform.
- Implemented **role-based access**, course scheduling, and administrative dashboards for educational use.
- Contributed to live production features, showcasing efficiency in **rapid low-code development**.

SKILLS

Programming Languages	Java, Python, SQL, Shell Scripting
Tools	GIT, JIRA, Confluence, GitHub
Cloud And DevOps	Kubernetes (K8s/K3s), Docker, Jenkins, CI/CD Fundamentals, GitLab CI Basics, AWS Fundamentals
Software Development	Object-Oriented Programming (OOP), API Integration, Version Control
Soft Skills	Problem-Solving, Communication, Collaboration, Adaptability, Teamwork
Infrastructure & Networking	Linux, REST APIs, NAT, Routing & Switching Fundamentals, FMC & FTD Security Concepts
Tools & Platforms	Git, GitHub, VS Code, Jira, Confluence, Perforce

PROJECTS

PodPilot - Automated FTD Simulator Deployment & FMC Registration Tool

Python, Linux, Docker, K3s, Automation

- Developed an automation tool to streamline the end-to-end FTD simulator deployment workflow.
- Automated VM setup, IP assignment, NAT configuration, K3s installation, pod deployment, and FMC registration processes.
- Reduced repetitive manual deployment effort and improved deployment consistency across simulator environments.
- Utilized Python scripting and infrastructure automation concepts to simplify deployment workflows and improve operational efficiency.

AI-Powered E-Commerce Recommendation System

Python, HTML, CSS, Java, React

- Built a personalized recommendation system using collaborative, content-based, and hybrid filtering models.
- Improved click-through rate by **15%** for over **10,000 users** using real-time query analytics.
- Enhanced product discovery and customer satisfaction, similar to industry platforms like Amazon.

LearnNow Training Management

Mendix

- Developed an end-to-end training management app with **course creation**, **scheduling**, and **role-based access**.
- Enabled educational admins to manage teachers, trainees, and courses with ease.
- Contributed to live projects during internship at **Siemens**, showcasing proficiency in **scalable low-code solutions**.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

PSNA College of Engineering and Technology

2025

- CGPA - 7.11

CERTIFICATIONS

ATE Phase - 1: Planning And Automation

Professional Training Program, Cisco Systems India Pvt Ltd

13-Jan-2026

- Completed training in planning, automation workflows, and software development practices.

ATE Phase - 2: Functional Testing

Professional Training Program, Cisco Systems India Pvt Ltd

10-Feb-2026

- Completed training in functional testing, software validation, and quality assurance concepts.

ATE Phase - 3: Non-Functional Testing

Professional Training Program, Cisco Systems India Pvt Ltd

05-Mar-2026

- Completed training in performance, reliability, and non-functional testing concepts.

ATE Phase - 4: Cloud Automation

Professional Training Program, Cisco Systems India Pvt Ltd

01-Apr-2026

- Completed training in cloud automation, deployment workflows, and modern software delivery practices.

GitHub Copilot for Software Development Using Python

Professional Training Program, Cisco Systems India Pvt Ltd

20-Nov-2025

- Completed training in AI-assisted software development using GitHub Copilot and Python.

Google Developer Training

Foundational, Google

- *Enhanced understanding of responsive and mobile-first design principles.*

ACHIEVEMENTS

Runner-up in Cyber Security Workshop Competition

Cyber Monk at PSNACE

2022

- Gained practical cybersecurity experience by implementing IAM and RBAC principles, which contributed to a secure application design expertise.

Participation in Dr. Kalam Young Achievers Award

World Youth Federation

2023

- Exhibited leadership and innovation by participating in the Dr. Kalam Young Achievers Award, reflecting commitment to advanced development methodologies.
